User Research | Interview Highlights

Interview Stats

Status	Burgundy Private	Burgundy
Scheduled	16	22
Completed	15	17
Cancelled	1	5
Avg Time	55 min	47 min

Users Association with Axis

- Most of customers mentioned , **RM** is the major reason for their continued association with Axis.
- Secondly, the Metal Card and its benefits was most cited reason

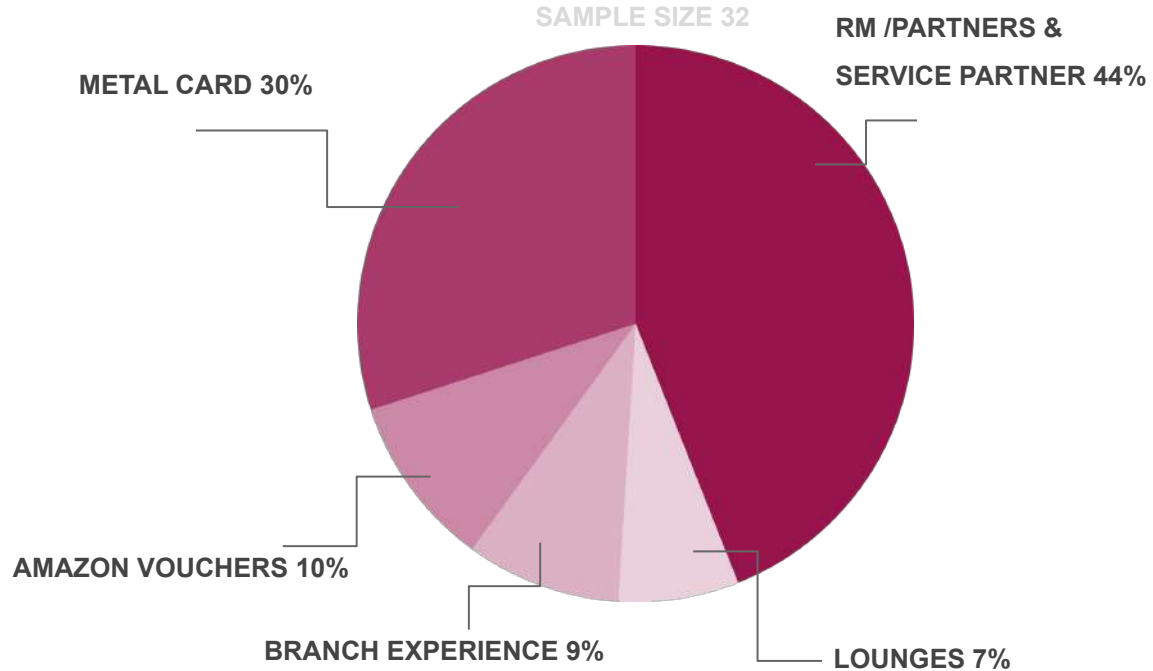

"The Only reason why i am still with axis bank is the black metal card"

"The folks are the sole reason I'm still with Axis."

Users feels Privileged

"The Key offering from axis which makes me feel privilege is - I can call my RM anytime"

Users Association with RM

- Challenges while using the app
- Investments, service requests, high-value transactions
- New investment opportunities
- Issues with internet banking and poor network
- KYC
- Problems related to FDs, cheque queries
- Issue with banking transactions
- Foreign exchange card
- Axis policies

"My RM always informs me about new schemes."

"Whenever I get stuck with my transactions, I call my RM and he gets it sorted for me."

"I interact with my RM frequently about my current investments and future options."

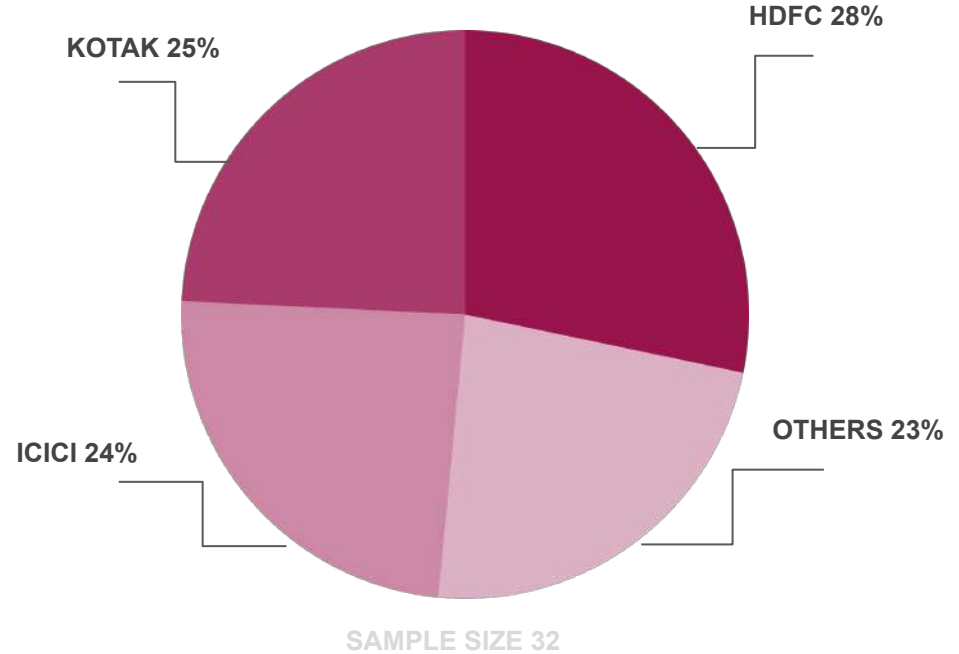

"Whenever I face issues using my app, I ask my RM to understand it."

Competitors Preferences

Others:

Citi
Grow
Zerodha
Dezerv

Most Used Features

The **most used** features of the application are:

- Paying Bills
- Fund transfer
- Checking Balance
- Salary payments
- FD and MF
- Forex for corporate
- Investments
- Credit Card Section

"I frequently check my investments and even create new FDs with any leftover money"

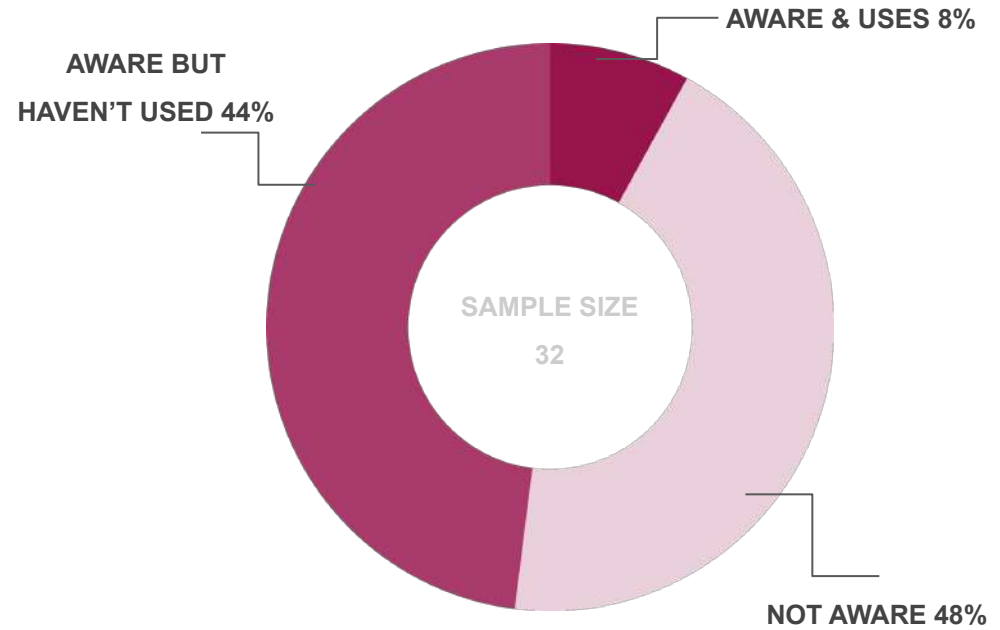

"I send money to my friends and family from this app as axis is my major banking partner"

"I often track my rewards and ask RM how to redeem them."

"Every month I pay my employees using the app."

Grab deal usage

User Problem

*"I want to **see account balances of individual accounts** without going inside."*

*"I got to know from my friend about amazon vouchers on app, but i **couldn't find it by myself**"*

*"Where can I **directly raise a query** apart from calling my RM."*

*"App has so many features that I don't use and it just **clutters my view**"*

*"**OTP is always late** and this creates a lot of issue for me."*

*"I am **unable to see the drawn balance** for my overdraft account".*

*"There are so many new and amazing **features** like booking a locker on app, but I was not aware about as it is **not shown upfront**"*

*"**Application zones out randomly** and I have already complained about it. Next time I am directly going to go in the MDs cabin"*

*"Error messages shows development errors and I **don't understand that**"*

”

User Expectations

1/2

"Why doesn't bank give **some incentive** to me for paying all my bills in time consistently"

"I have 2 joint accounts with my wife and my father, but when i see balance I **cannot see individual balances** for each of these accounts"

"I want to **categorise my payees** like family, friends so i can find them easily"

"I want to **see my max life insurance** details in MB"

"Is there a way for me to **use UPI** in spite of being an NRI customer?"

"When adding an amount (Fund Transfer), we should **show it in words**, because a single digit typed incorrectly can make a huge difference as its challenging spl for round figures"

"Citi gives **diaries to its customers** which is very beautiful appreciating gesture. even arranging get togethers for customers creates a feel good factor"

”

User Expectations

2/2

"There are too many tabs and its cluttering the UI."

"I want to have **manually entry** as the slider makes it hard to add exact amount."

"I want to see my **most used features** upfront?"

"Can I have **single login** even for multiple Customer IDs?"

"In ICICI they recharge the **FAstag wallet** automatically. Can we have that feature here as well?"

"Can I **customise the home screen** by adding the features that I need the most?"

"I have banked previously with Citi and HDFC as well and I like their security. Even Axis can get at par with their security by **adding another layer of OTP verification for fund transfer**.

It's good that Axis allows me to book locker from my app but if I can see the size of it, i can make the choice easily
Being a burgundy customer, I should get **preference for locker** for branch near my home

User Research | Persona

Persona Summary

Service

Ex-employee of the bank enjoying his retirement

Swapnil Iyer

Building wealth for the next generation

Occupation	Age
Service	66
Location	Sex
Mumbai	Male
Investment Value	Citizenship
10-50 Cr	Indian

Design Research

Internal Competitor UX analysis

Analysis of the competitors screens by focusing on UX Journeys and UI components

No. of competitors : 8

Name of competitors : 

Reason for choosing : Based on internal stakeholders interviews and suggestions

Process followed : Categorized the screens, noted down points on UX, information sorting, visuals, etc and grouped these points to see patterns.

Brainstorming through Garage Sessions

Analysis of the competitors screens by focusing on features

No. of Sessions : 7

Time per session : 1hr 15mins

No. of competitors : 5

Name of competitors : 

Reason for choosing : Based on internal stakeholders interviews, to see what other competitors are doing (other than banking sites).

Dashboard

- Portfolio overview necessary.
- To include total investment total bank balance, total assets & liabilities, Net worth
- Track and reminder for due dates for credit cards and insurances.
- Data visualization like simple line graph, pie chart

Must have

(Mentioned
80-90% times)

Should have

(Mentioned
50-60% times)

- Details about period of investments, history
- Spends per month can be shown graphically

Account & support

- Ability to add family member in an account and create family account to track family investments
- Facility to contact RM and other support various channels like mail, SMS, etc.

News & update

- Daily market updates to be highlighted. This can be shown like 'Instagram stories'.
- 1 liner (relevant) news snippets can be shown to the users wherever necessary. Local & global both

- A FAQs section with good amount of information
- A dedicated news section

Other

- Taxation report, statements generation based on investments.

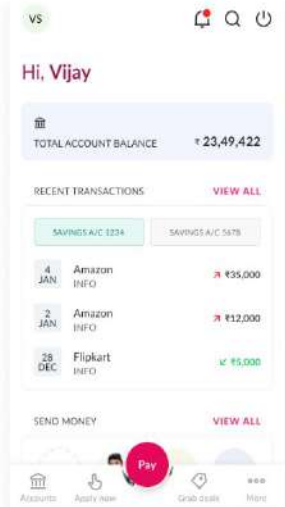

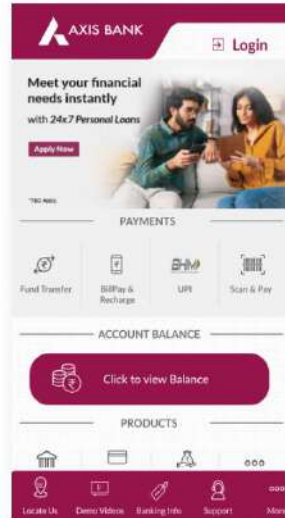

- Concept of creation of goals. (named as Minisave, pot) suggestions based on user goals

UX Pointers

- Information sorting of the investment journeys. Eg: Trending now, Popular first steps, Mutual fund categories (Tax saving, Top 50)
- Provide subtle clues to users for suggesting/exploring more investment opportunities or to push products.
- Inclusion of Good filtering. Eg: Usage of Chips, cards.
- Use of icons, logos (brands & companies)
- Addition of currency calculator for international investments
- To show critical and necessary information for various investments options.
- Investment recommendations based on user's needs, preferences, risk etc.
- Tracking loan details and showcase credit score.

Existing screens for MB

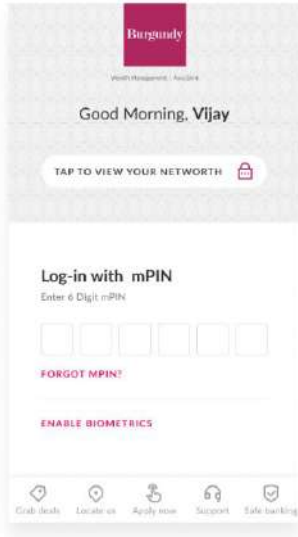

Moodboards for Burgundy

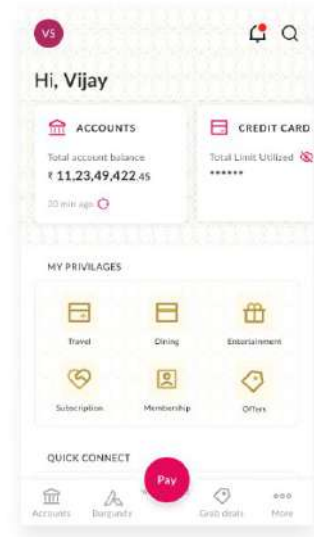

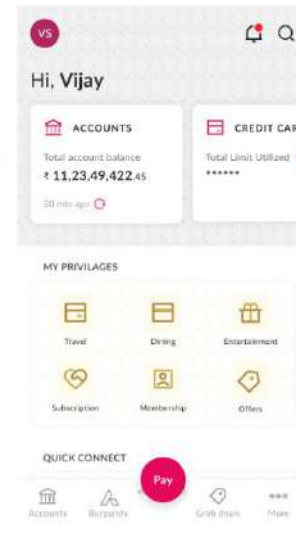

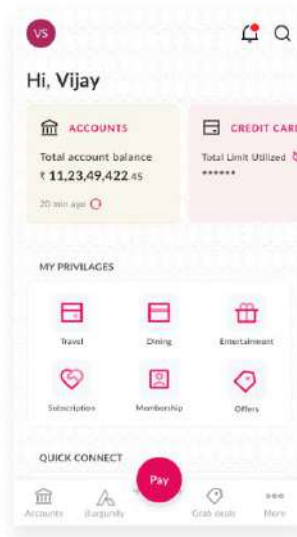

Note - Features in design are based on the hypothesis and would change based on the PRD

- Need to check the feasibility of the design with dev team

Next Steps

Research Phase

Garage Sessions:

-To Complete garage session on the research takeaways from the interviews this week(5 days)

-End of research phase this week.

Design Phase

BRD:

The outcomes from the garage session & internal product/feature discussion will be used to create BRD

Tentative Timeline: **2 Weeks**

Design Phase

(To be run in 2 weeks sprint cycle)

- Creating Wireframes based on PRD/BRD
- Creating Visual Design
- Creating Prototype

** Doing usability testing whenever required*

Tentative Timeline: **2.5 months**

** May change based on BRD/PRD*

Development Phase: TBD.

Thankyou
