

Research Report

Sales Assisted Loan Application

Education Loan, Home Loan

Contents

RESEARCH PLAN OVERVIEW

PROCESS OVERVIEW

STAGE 1: INITIAL CONNECT WITH CUSTOMERS

STAGE 2: PREPARING APPLICATION

STAGE 3: LOGIN & VERIFICATION

STAGE 4: AGREEMENT & DISBURSAL

OTHER OBSERVATIONS

Research Goal

The study aimed to build understanding of the existing sales assisted loan application journey (for home and education loan) to inform the development of a digital solution for the same.

1. **Understand** how sales staff **currently** assist home & education loan application.
2. **Identify** key **friction** points, **inefficiencies**, and **workarounds** in the current process.
3. **Capture expectations for a digital intervention** that would enhance their work.

User Profile and methodology

~60 minute in depth interviews, ~15 mins short interviews and shadowing sales staff like Relationship Officers and Sales Managers at Axis Loan Centers in various locations.

Overview

Sales assisted lending at Axis Bank

Current Process Overview

Stage 1: Initial connect with Customers

People Involved

- Leads sources (Direct potential customers to sales staff)
- Relationship officer (follow up with leads to start applications)
- Sales Manager (delegate leads to RO, manage leads, and guide follow ups)
- Customers

Stage 2: Preparing Application

People Involved

- Relationship officer (prepare applications by collecting details and documents)
- Sales Manager (execute formalities, guide ROs)
- Customers (provide documents and details)

Stage 3: Login & Verification

People Involved

- Relationship officer (monitor applications and ensure progress)
- Sales Manager (escalate and resolve blockers)
- Operations (process applications)
- Credit Team (verify applications and approve or reject cases)
- Vendors (perform verification like legal & tech checks)
- Customers (aid in query resolution if required)

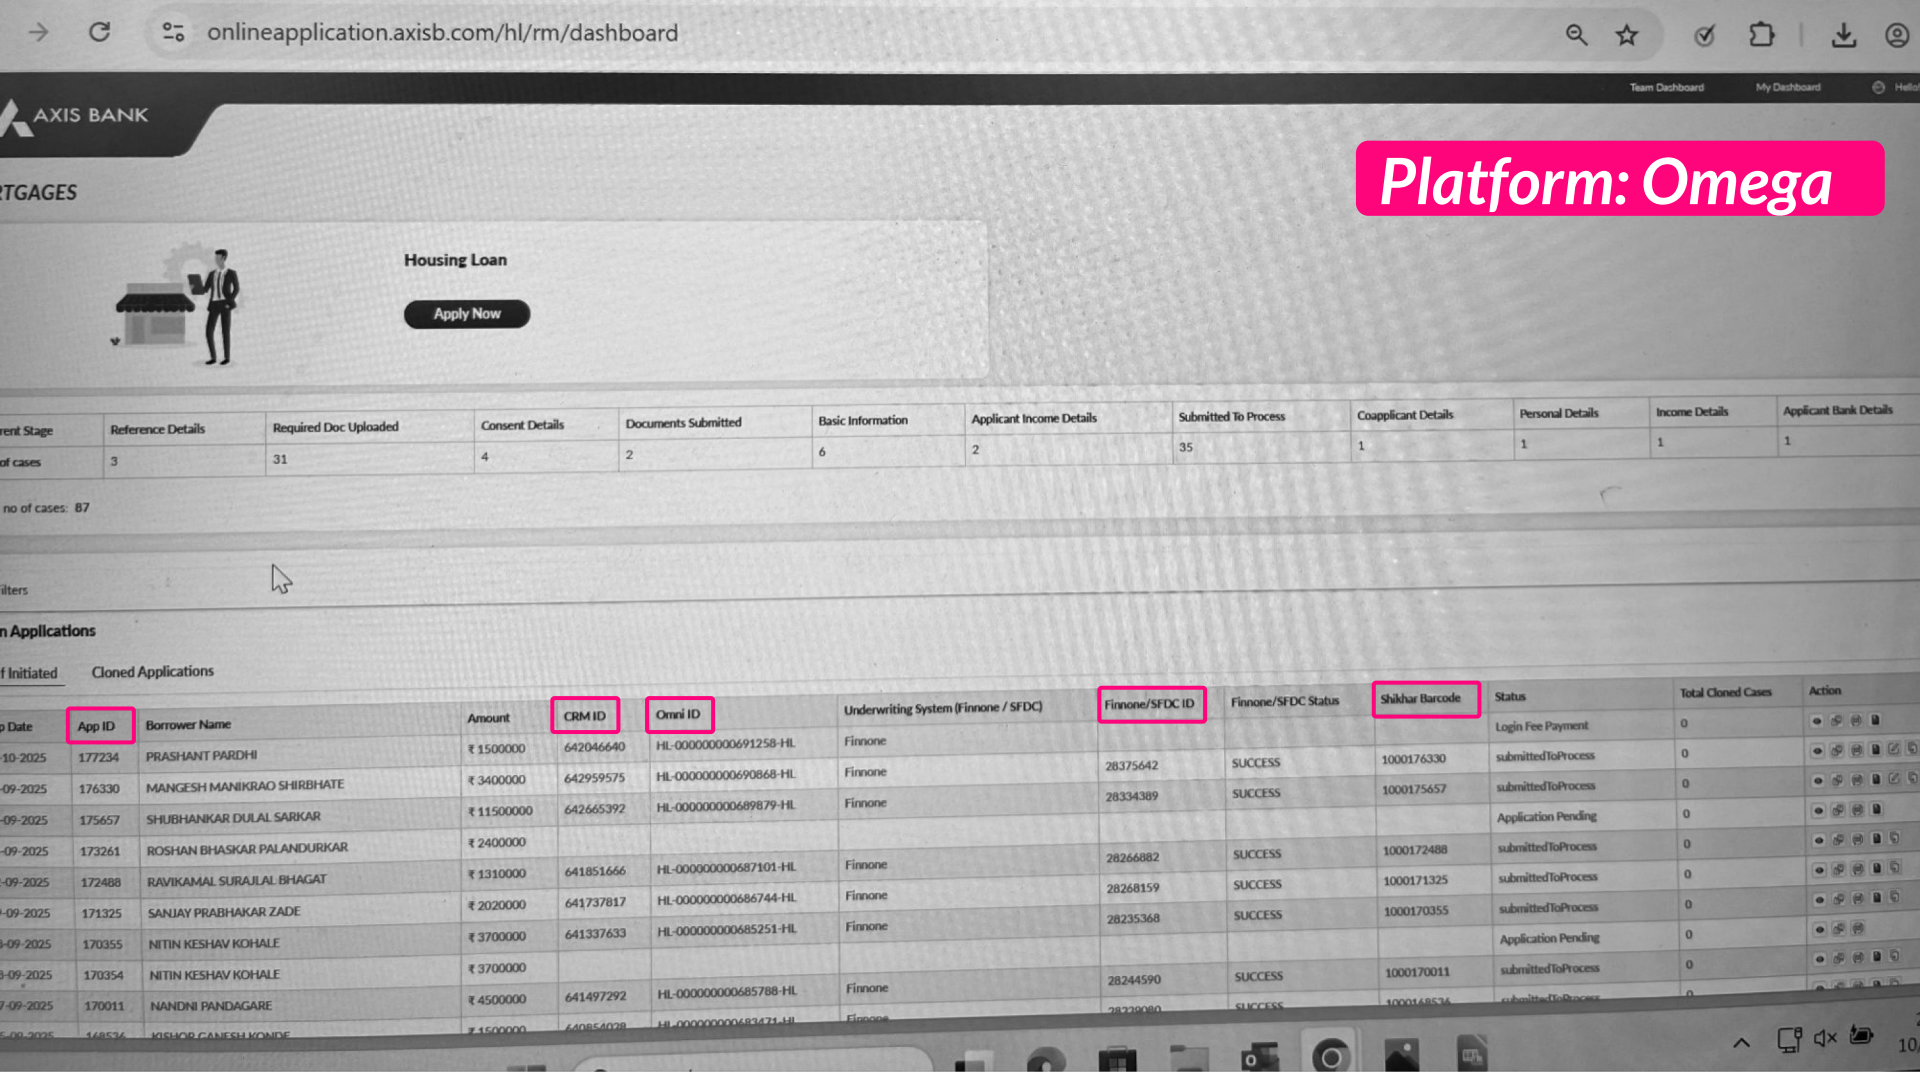

Stage 4: Agreement & Disbursal

People Involved

- Relationship officer (finish final formalities)
- Customers (finish final formalities)

Current digital ecosystem

Name	Used for	Comments
Omega	Loan Application (only home loan) Tracking queries (both loan types)	This portal is visible as 'Omni' for the Operation team. An Omni ID is generated by the Operations team when the file is scanned for login. This ID is used by sales staff as reference to track queries raised before file is sent to credit for verification and evaluation. Once a file has been logged in, an App ID is generated.
MLP	Loan Application, Tracking queries	Only for Home loan (Salaried Individuals)
Branch Analytics	Tracking Applications, Queries	RO can access only using SM credentials
CRM Next	Receive leads, Tracking applications	Leads directed from AVC or by ASM, SM
Siddhi	Tracking application status	Only application status visible, not queries
Shikhar	Tracking and resolving queries	Queries uploaded by Operations and accessed by sales staff. Documents can be then uploaded as required
FinnOne	Used by Credit Team for data entry and to calculate disbursal	Can be accessed by Operations Team
Delta	Digital process portal for Education Loan	Staff yet to receive access

QUERIES MANUALLY RECORDED

MANUALLY RECORDED UPDATE

PORTALS TOGGLED BY OPERATIONS STAFF

Primary Insights

CHALLENGES

- Axis bank's current digital ecosystem for assisted loan application has largely manual data entry.
 - There are multiple platforms that the staff needs to toggle between to manage loan applications.
- Overall, the sales staff is dependent for various tasks for managing loan applications
 - High dependency on customers to timely procure right documents and finish formalities.
 - Dependency on Managers to access systems and portals.
 - Dependency on counterpart teams to monitor applications.

EXPECTATIONS

- A faster process
 - Leveraging automation rather than just digitisation to reduce dependencies and turnaround time.
 - A unified platform that enables a seamless & visible workflow for all teams involved in process end-to-end.
- An easier process
 - Optimising efforts and time by re-sequencing steps like checking CIBIL earlier or providing a 'subject to verification' sanction.
 - Possible leniency like allowing the file to move back and forth in the system or reducing FCU checks.

Stage 1

Initial Connect with Customers

About Stage 1: Initial Connect with Customers

The application process starts by connecting with potential customers from various sources. For the sales staff, the goal at this stage is to

- Quickly gauge if the customer is eligible for a loan
- Understand the customer's needs and set realistic expectations
- Address customer queries and provide consult for best offer possible

Potential customers are identified/ sourced

Sales staff calls them to arrange a meet (in person or on phone) depending on location and availability

TAT
2-5 mins

Staff tries to build a rapport and tries to gauge if lead will be successful

TAT (Customer dependent)
10-15 mins

Staff gathers details to calculate tentative eligibility, explain offers, and convince customer for application

TAT (Customer dependent)
10-15 mins

Sources of leads

INTERNAL

- Potential customers walk in to the branch and are redirected by BROs to the sales staff.
- ETB customers are reached out by BROs and if they need a loan, they are redirected to the sales staff.
- AVC agents redirect potential customers who dropped off from loan application journey on the Open app.

EXTERNAL

- Connectors share contacts of potential customers.
- Open Market includes real estate brokers, builders, property dealers, chartered accountants, architects, and lawyers — basically anyone in the ecosystem who can refer clients needing loans.
- Direct Sales Agent (DSA) handle customer engagement, documentation, and submission till login.

Customer Observations for Stage 1

(1/2)

BEHAVIOURS

- Loans being a major financial decision, customers approach banks cautiously.
- They conduct some background research and pose questions to compare against competitors. Recurring questions are about rate of interest, time to sanction and disbursal, tenure, and penalties or fees.
- Customers who are serious, stay back and continue process after doubt clearing.

"ICICI bank is giving 8.6%, you're quoting 8.85% - why should I go with you? HDFC is also 0.25% cheaper than Axis, right?"

"What will be my monthly EMI for a ₹50 lakh loan? And are rates fixed or floating?"

"I already have a car loan and this is my income. Am I still eligible?"

"Do I need to pay processing fees upfront? And how quickly can you sanction the loan? What about the whole process, how long will it take?"

Customer Observations for Stage 1

(2/2)

CHALLENGES

- Customers are skeptical about financial products and worry about hidden charges or being misled.

NEEDS

- Be well informed and feel assured that the information being presented is correct and given offer is beneficial.
- Seek factual understanding from the sales staff on why a certain offer is more beneficial even if the competitor is giving a better interest rate or some other loan component.

"...offers and benefits batata hu ki agar aapka yaha 10% interest hai yaha 7.5% hai...iske wajah se principal amount me jo savings ho raha hai wo thoda breakdown karke unko batata hu..unke liye kya benefit hai usse wo convince ho jate hai aur unke agar paise bach rahe hai toh convert bhi ho jate hai"

- Relationship Officer (Home Loan)

"Customer says they'll share documents only after we guarantee approval. So I try to convince by showing bank's privacy policy link and send the bank's data privacy commitment on WhatsApp. I try to explain that their info goes only to the bank they choose, nowhere else...This is especially challenging with first-time callers or online leads"

- DSA Agent (Home Loan)

BEHAVIOURS

- Be completely upfront and transparent about loan details and process to avoid setting unrealistic expectations.
- Breakdown offers to help compare actual benefits against competitors'.
- Provide to visit home to clear doubts in-person and collect details to showcase reliability.
- Share examples of success from previous applications as social proof.

"They say SBI allows EMI to start after completing the education. So I explain that how that may entail compound interest which is not beneficial in the long run.."

- Relationship Officer (Education Loan)

"I also share some examples from the past like a case where we gave timely disbursal, or another where we gave flexibility of FOIR. I also try to talk about Axis as a brand name, our clientele to help gain their trust and convince them."

- Relationship Officer (Home Loan)

CHALLENGES

- Finding a suitable time or unavailability and last minute cancellation by customer delays the process.
- Lack of customer awareness or skepticism about being misled means the ROs has to exert more effort and energy to convince them.
- Sometimes, the initial connect with the customer might be done by other people like the DSA, Connectors, BROs, and AVC agents. Inconsistencies in everyone's approach can lead to potential miscommunication and improper guidance of customers.

"Pehli bar baat hone k baad bhi customers kabhi details leke aate hai..toh unko main apne seniors k samne le jata hu. Jo maine samjhaya, wahi wo sir bhi samjhate hai. Customer ko mere pe 50% trust hai aur sir ka 50% aise pura fir 100% convince hote hai."

- Relationship Officer (Home Loan)

NEEDS

- Quickly check if customer is eligible to get a loan. If yes, start document collection for login.
- Appear knowledgeable and dependable to gain the customer's trust and convert them to a lead.
- Identify urgent, high-end or Burgundy customer cases so that they can be fast tracked.

"The co-applicant's salary needs to be minimum 35,000 per month and that too net salary. And it is also compulsory that the student completes the course before the co-applicant's retirement. Otherwise they are not eligible to get a loan. Or I suggest that some other blood relative, mostly the paternal uncle can be the co-applicant instead."

- Relationship Officer (Education Loan)

Stage 2

Preparing Application

Stage 2A: Document Collection

Stage 2B: Application Form

About Stage 2: Preparing Application

The second stage consists of collecting required documents, preparing the application form, and compiling a file for 'login' (submitting everything for processing). For the sales staff, the goal at this stage is to

- Collaborate efficiently with customers to procure details and documents to be attached in the file.

Staff requests documents from customer (emailed to Manager or handed over physically)

TAT
(Customer Dependent)
2-4 days

Staff starts filling in application form and compiling the documents into a file (Home loan as a digital process via Omega)

TAT
30 mins - 2 hours

Staff fills and prints the sourcing sheet from excel using Manager's laptop

TAT
2 mins

Staff stamps documents with OSV and masks Aadhar

TAT
2 mins

File is glanced by Manager and they sign all the stamped documents

TAT
5 mins

Customer Observations for Stage 2A

BEHAVIOURS

- Slack after initial cooperation because requirement of excessive documents makes process tedious.
- Delay sharing documents or submit partial/ incomplete, and poor quality documents. Reminders from sales staff and frequent back and forth often causes irritability.

"sab jagah online hai aapke (Axis) k yaha kyu nahi?...aap printouts leke aa jao hum sign kar denge"

CHALLENGES

- Privacy concerns when sharing details and documents due to fear of data misuse, spam calls, identity theft.
- Certain documents like salary slips or few legal ones are not readily available with everyone. Procuring them is timetaking and adds to the stress if they don't know how to procure them.

"education loan k liye itne details kyu chahiye! Parents k itne details kyu chahiye? Baki banks me toh itna nahi hai.."

"My company does not give digital salary slips, we don't have any platform for that. I will have to mail and request it from the HR, it will take time."

NEEDS

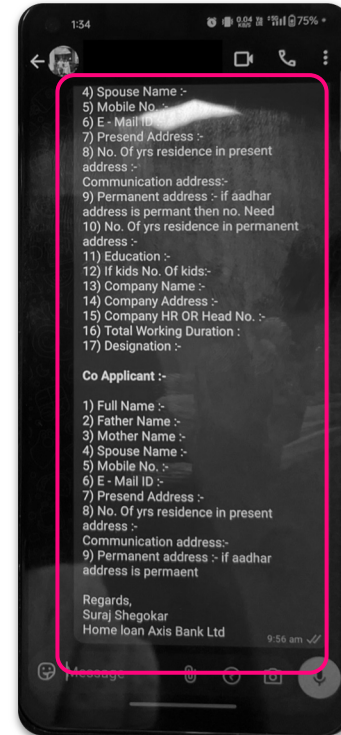

- Lesser documentation and a quicker process of document collection.
- Reasonable explanation why excessive details are required at Axis Bank compared to easier process at competitors.

Sales Staff Observations for Stage 2A

(1/3)

BEHAVIOURS

- Send a pre-formatted Whatsapp message to customers containing the list of documents they need to keep ready. Once ready, they offer to collect documents from home if customer cannot email them.
- If improper documents are received, they communicate (via phone) and guide customers to provide the right format and quality.
- In the interest of time, they use improper documents for login and parallelly try to keep the right ones ready for audit during verification.
- Once the documents are received they use the details to calculate and share tentative eligibility using the net salary amount, FOIR*, etc.
 - Those who are experienced use their mobile's calculator while some use the excel formats provided by the bank.

LIST SENT TO CUSTOMER
OVER WHATSAPP

*Fixed Obligation to Income Ratio, a financial metric used by lenders to assess loan eligibility.

CHALLENGES

- The 'login' process is delayed due to dependency on customer for procuring all documents.
- Exercising efforts in convincing customers why extensive documents are needed compared to competitors.
- Back and forth with customer to receive right format and quality of documents leads to customer irritability and lowered cooperation. Verbal guidance is not enough in motivating customers to provide timely and proper documents.

"jaise main unko bolta hu ki downloaded Aadhar card required hai..par wo normal smartcard ka photo lekar/ xerox lekar rakhte hai..Ye bhale login k liye chal jaega but verification me proper format hi chahiye hota hai..toh unko bolta hun ki before disbursement aapko ye download karke self attest karke taiyyar rakhna hoga..."

- Relationship Officer (Home Loan)

Sales Staff Observations for Stage 2A

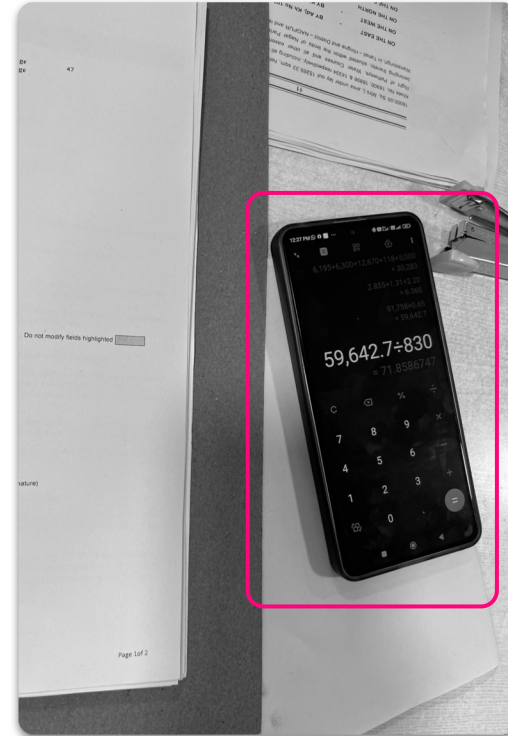

(3/3)

NEEDS

- Keep a track on which documents have been submitted and which are yet to be received. Ensure all documents are in the required format.
- Reduce back and forth with customers such that proper documents are received the first time itself.
- Calculate and share tentative loan amount that is possible to be sanctioned.

"So customers at times are not ready to give even the university offer letter as they are unsure...they come up with stories such as so and so bank does not ask all this (even though they know it is false) and we have to assure them that it is a necessary part of the process and they can look it up online. They may not be able to furnish some documents even after telling."

- Relationship Officer (Home Loan)

USING MOBILE TO CALCULATE TENTATIVE
ELIGIBILITY

Sales Staff Observations for Stage 2B

(1/2)

BEHAVIOURS

- For applications that use a physical process, the staff fills the application form on behalf of the customer by cross referencing documents and details provided by them. Customers are just needed to sign the form wherever needed.
- For applications that use a digital process, the overall interaction remains similar except, the staff needs to coordinate with the customers to get OTPs as generated.

"Kuch customers toh khud chahte hai ki tum ye details lo aur bhar do..ab wo kuch galat bhar denge toh unka fir cross sign lagega, ye sab customers ko nahi pata hota hai..toh hum hi puch puch k ya docs me dekh k fill kar dete hai"

- Relationship Office (Home Loan)

NEEDS

- Ensure form filling is accurate to avoid rework (in case of physical) or cloning (in case of digital process).
- Indicators for input fields that are unfilled, before submitting the form.

"This requires my utmost attention, because if we make mistakes, we cannot edit it. We have to clone the form. Some provision to edit should be given. At times we too make mistakes...like forgetting to mask Aadhar— the system accepts it for the time, but if we remember it post taking consent from the user, then nothing can be done.. Operations will reject it."

- Relationship Office (Home Loan)

Sales Staff Observations for Stage 2B

(2/2)

CHALLENGES

- Since details are referred from documents submitted, the form remains incomplete if customers delay provision.
- Specifically in the digital process,
 - details still have to be manually typed in by referring
 - form is non-editable post consent and instead needs to be cloned when rejected.
 - audits don't notify which field needs to be reworked requiring manual scanning of entire form.
 - technical issues like slow UI and session timeouts
 - dependency on customers to feed in OTP

"we have to be in touch with the customer for OTPs from time to time...some 5-6 OTPs are generated that they have to share. Almost 40% drop off saying there's too much calling.."

- Relationship Office (Home Loan)

STAFF REFERRING DOCUMENTS ON
MOBILE TO FILL IN ON DESKTOP

Stage 3

Login and Verification

About Stage 3: Login and Verification

(1/2)

The third stage is submitting the application for processing. The process of submission (or handover, in case of physical process) is quick and simple. The file is then carefully scrutinised to decide whether the loan should be sanctioned or rejected. For the sales staff, the goal at this stage is to

- Keep updated with file and query status
- Ensure quick resolution of queries raised in audits to progress applications.

Staff hands over the file to Operations' staff member for login

TAT
2 mins

Operations staff scans the file and generates an Omni ID

TAT
4-5 hours

If they identify anything incorrect or improper, they record it as a 'query' (in an excel file or the portals). Mail the queries to Managers.

TAT
5 mins

Sales staff periodically checks for queries either by visiting the Operations staff or on Manager's email

TAT
2-10 mins

About Stage 3: Login and Verification

(2/2)

The third stage is submitting the application for processing. The process of submission (or handover, in case of physical process) is quick and simple. The file is then carefully scrutinised to decide whether the loan should be sanctioned or rejected. For the sales staff, the goal at this stage is to

- Keep updated with file and query status
- Ensure quick resolution of queries raised in audits to progress applications.

Sales staff resolves query according to the requirement like providing better or extra documents (with the help of customers).

TAT (Query dependent)
1 hour - 1 day

Once all queries are resolved the Operations staff moves the application to the Credit team and generates an App ID.

TAT
Nil

The Credit team staff conducts multiple levels of verification and queries are raised that Operations share to Sales staff for resolving.

TAT
1-2 days

The credit team calculates eligibility and sanctions or rejects the file depending on the verification.

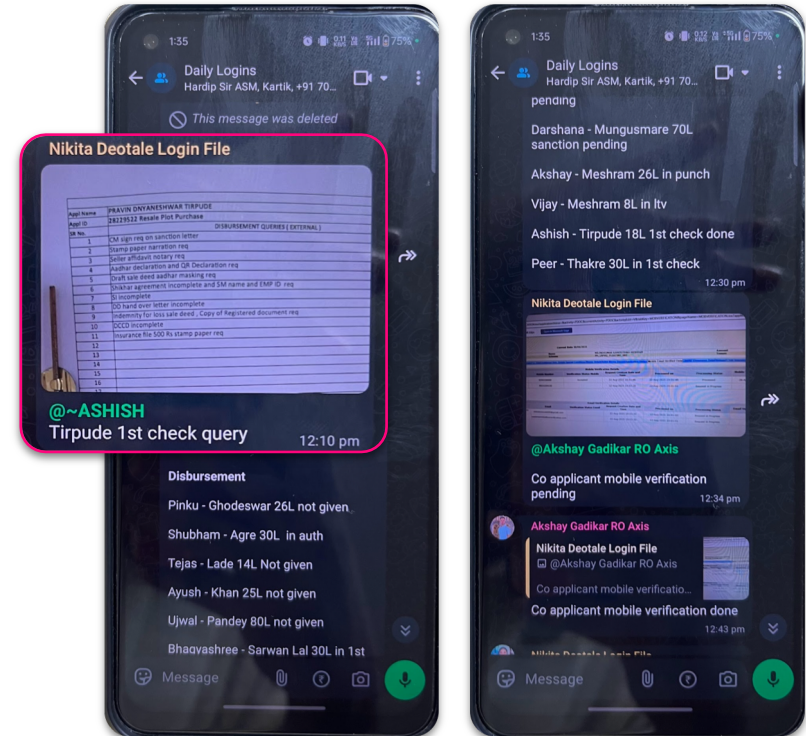

TAT
1-2 days

Sales Staff Observations for Stage 3

(1/4)

BEHAVIOURS

- For logging a file via the digital process,
 - external tools (like combining pdf) are used to reformat files into acceptable uploads
 - internal entry is done in *Shikhar* after official application in Omega so that customer can receive SMS updates
- Post 'login', the main task is to monitor any queries that may be raised. For most staff, this is the first task of their day; to check file status and resolve queries as soon as possible.
- As a workaround to lack of easy tracking solutions, the staff has created internal Whatsapp group that is moderated by a coordinator to receive updates of queries.
- Be connected with customers if a query resolution depends on them and share application updates whenever customer ask for the same.

WHATSAPP GROUP MADE TO RECEIVE QUERY UPDATES

CHALLENGES

- Monitoring Applications
 - Dependency on manager's email and laptop to check new queries sent by operations team.
 - Frequent calls from customers for updates since they don't have a portal to check themselves (only applicants updated in *Shikhar* receive SMS updates). ROs have to also pacify customers when the process takes too long.
 - While *Siddhi* is an accessible platform for monitoring, it just showcases status and not queries. Moreover there are no push notifications for status updates and staff has to check by themselves.
 - When workload increases, verification teams (operations, credit) might not update *FinnOne* or *Shikhar*, affecting visibility of file status.

"Depends. Sometimes customer calls us and asks..and if we see the file status not updated in Shikhar nor any query, we walk upto Operations to know the status. Sometimes the client has requested it on urgent basis, so we follow up such cases by meeting Operations."

- Relationship Office (Education Loan)

CHALLENGES

- Resolving Queries
 - Customers unaware of what is considered as 'obligation' making undisclosed obligation and CIBIL the major reasons for loan rejection.
 - Resolutions that are customer dependent (ex. proving new docs, signature, new affidavits) often get delayed due lack of cooperation and irritability.
 - Technical queries like 'mapping issues' where the system fails to identify reporting hierarchy.
 - Vendors responsible for legal and technical verification either slack or delay updating, which delays next steps.

"Resolution is based on the query. 90% of the times it is customer ended. Either more documentation is needed or majority of the times they haven't disclosed all their obligations and it gets flagged when the Credit Team checks the CIBIL. So we have to ask for additional documents from the customer...they tend to get frustrated at times as to why are we repeatedly asking for more documents again and again whereas the sanction is taking time."

- Relationship Office (Home Loan)

"All we can do is tell why rejection happened, then bare customer frustration due to time wasted...at times they ask 'why was this not told earlier?' How can we tell them as we have no access to CIBIL! Most issues could be solved if we had access to customer's CIBIL."

- Relationship Office (Education Loan)

NEEDS

- Ensuring customers have disclosed all obligations at the beginning itself by thoroughly questioning them.
 - Or have access to their CIBIL at the beginning, since it is a strict parameter for sanction/ rejection.
- Monitor file status, query generation and resolution in a single platform.
- Receive notifications of queries raised and update counterpart teams after query resolution.
- Enable customers to view updates themselves so they do not frequently contact sales staff for it.

"The query comes to me via email. Then I resolve it. If I am able to resolve it quickly, I will reply to the email, then go and tell the Operations staff who had raised it, that I have resolved. I do this so there is a double check from my end. The Operations team is already loaded with work and my reply may get lost in the swarm of emails that they receive, so it is always better to go and tell them personally as well."

- Relationship Office (Home Loan)

Other Cases of Queries

MOBILE NOT LINKED TO AADHAR

One common mistake happens with the mobile number connected to Aadhaar card. A common mistake is that many users don't remember the phone number that is linked and the OTP is lost. Some staff has started using **E Aadhaar** to check if the Aadhar is connected to the correct mobile.

DOCUMENT ISSUES

Majority of customers have documents that have different particulars. Either the name or address or signatures don't match. Collecting address proof is a common problem especially for customers staying in other cities for their work.

NON-UPDATED OBLIGATION

In a recent case, an obligation came up that the co-applicant (customer's father) had a pending loan. Upon talking to him it was found that they had already cleared it. But it was not reflected on CIBIL. So the salesperson got a letter from the customer along with closure report of that loan and processed the application further.

Vendor woes

POOR COOPERATION

Vendors slack in reaching out to customers when performing checks. They state umpteen reasons like customer unavailability, extended geo limit, etc. In other cases, they perform the checks but delay in updating it to the loan team and the application's update remains stagnant.

"Vendor customer k ghar jata hai...agar waha customer na ho toh aisa nahi ki aaju baju puch le ya firse try kar le..Jab hamara FCU team verification karwata hai toh ok mil jata hai but jab ye vendor karta hai tab usko nahi milta hai..Ab agar main branch verification bhi maangu toh wo sirf mere liye to hbaithe nahi hai. Wo bhi apne hisaab se time nikale k hi karenge verification"

- Sales Manager (Education Loan)

BRANCH VERIFICATION AS WORKAROUND

Sales Managers reach out to the Operation Head or the Branch Relationship Officers requesting branch to provide verification.

But branch members tend to cooperate slowly if the customer was sourced from a DSA or Connector and not the branch itself. Branch verification usually takes 1-3 days.

Stage 4

Agreement and Disbursal

About Stage 4: Agreement and Disbursal

The last stage for sanctioned applications consists of completing agreement formalities and final verifications before disbursal. For the sales staff, the goal at this stage is to

- Ensure timely completion of formalities and fees collection, to move file to disbursal.

If sanctioned, the agreement letter is emailed to the customer and sales staff guides customer to sign it and pay remaining fees.

TAT (Customer Dependent)
1-2 days

In case of home loans, vendors conduct legal and technical checks.

TAT
1-3 days

The signed agreement, the documents and the checks are all verified again before disbursal. If everything is accurate, then loan is disbursed.

TAT
1-2 days

Sales Staff Observations for Stage 4

BEHAVIOURS

- Inform customers (and remind, if needed) over call that agreement has been emailed and they need to sign it.
- Visit customer home to assist, get remaining signatures and clear any pending doubts.

"It is a bad experience. There are too many documents close to 80+ that need to be signed by customers and it gets very frustrating for them."

- Relationship Officer (Home Loan)

CHALLENGES

- The physical docket is tedious to compile. It also is laborious for customers who have to sign 20+ instances. Since this process is dependent on customer availability, it can get delayed.
- Few customers want to go through the entire docket just as a double check for satisfaction that 'everything is as told'.

"Just that customers at times delay or are not available. Also too many signatures needed is something that ticks them off. At times we explain the, why this agreement is needed and stuff."

- Relationship Officer (Education Loan)

Other Observations

Other Observations

MANAGING MULTIPLE APPLICATIONS

- For most ROs, managing multiple applications is routine and don't find it to be difficult.
- But some have come up with their personal team trackers that are used to prioritize cases (high value, high risk, complete documents).
- Others rely on update systems used and shared by counterpart teams like Operations and Credit team.

"No plan...usually we are able to meet our targets. We do follow up a lot with customers, that way we try our best from our end."

- Relationship Officer (Education Loan)

"I see it like, this months login will be next months disbursal. So I target for more logins to make sure by next month they have disbursals. But not all logins end in disbursal."

- Relationship Officer (Education Loan)

"We try to focus on high-value customers and keep buffer...like login ₹40 Cr for a ₹20 Cr disbursal target!"

- Relationship Officer (Home Loan)

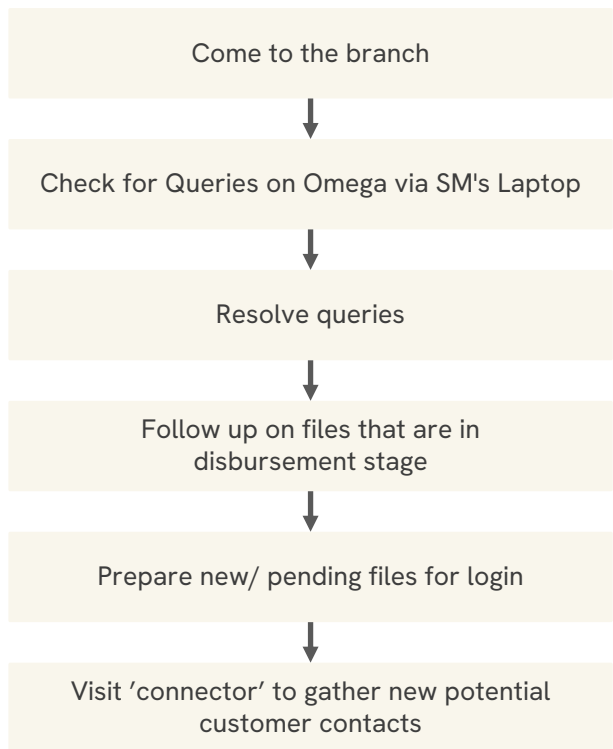

"Targets have to be driven by Managers. We start the day at branch with morning huddle and planning certain products. But branches have different priorities so it's hard to set our own plans separately."

- Sales Manager (Home Loan)

MONTHLY TARGETS

- Most ROs do not have any particular planning to achieve their monthly targets. Rather, they depend on their managers for guidance, delegation, and prioritization of leads.
- ROs however shift focus from customer & market visits to logins & disbursals around last week of the month.

A day in the life: Relationship Officer

"Kal ye file thi nahi mere pass toh reh gaya tha ye kaam mera. Maine documents saare collect kar liye tab tak. Abhi isko banake login me dalna hai"

- Relationship Officer (Home Loan)

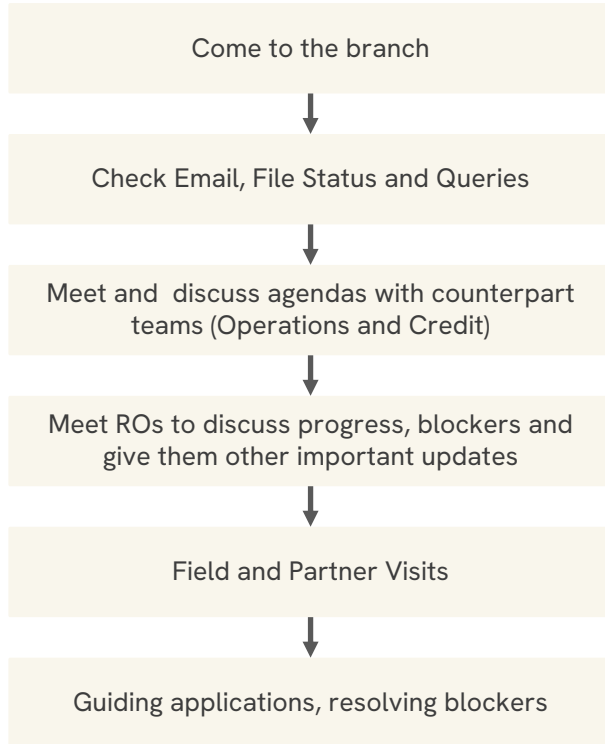

"main subah se isi process me lagi hu (monitoring updates by being physically present near Ops team)..month end me ye hi chalu hota hai..jab naya month shuru hoga fir visits wagera hum badhaenge...25th k bad usually hum files pe zyada focus karte hai ki login and disbursement ho jaye"

- Relationship Officer (Home Loan)

"Sir (SM) hote hai na agar kuch doubt laga toh..kabhi agar laga ki kuch policy me baithega ya nahi, ya for agar koi case thodi complicated ho toh unse puch lete hai...main policy padh bhi sakta hu but sir agar batate hai toh practically zyada acche se samajh ata hai"

- Relationship Officer (Education Loan)

A day in the life: Sales Manager

"sales me koi aisa time fix nahi ho sakta ki hum itne samay ye karenge, wo karenge..it depends on the situation..agar koi channel partner phone karke bolta hai ki 1 ghante me customer aane wala hai to hume jana padega. Ya agar kisi ka urgent application hai, visa apply karna hai to wo file urgently pehle banate hai. Everyday subah ka situation kya hai hume nahi pata hai..Generally subah 10-11 baje tak kaam shuru nahi hota hai (sales) tab tak hum ye background wala kaam kar lete hai"

- Sales Manager (Education Loan)

"Meeting kar leta hu mere ROs k sath..kiska kitna login hai ,kaun kaha jaega, kitna disbursement hai..agar wo subah hi field pe gaye hain toh humara Whatsapp group hai usme baat kar lete hai"

- Sales Manager (Home Loan)

About competitors 1/2

Advantage	Description	Competitor(s)	Quotes
Faster Digital Processing	Competitors have faster, more digital processes with minimal manual intervention, resulting in quicker turnaround times (TAT) for customers.	ICICI, HDFC, Piramal, NBFCs	<i>"NBFCs sanction loans in 2-3 days. ICICI is fully digital and faster."</i>
Integrated Digital Platforms	Competitors use single-window or integrated systems that allow real-time updates, digital uploads by multiple stakeholders, and minimal documentation.	ICICI, HDFC	<i>"ICICI iLens is complete digitised; updates are quick and automatically given to multiple levels. HDFC Lasersoft allows triggers by multiple people."</i>
Minimal Documentation & Auto-Fetch	Competitors automatically fetch documents such as ITR, GST, or bank statements from government portals; customers only provide basic details like PAN and Aadhar.	ICICI, HDFC, IDFC, Aditya Birla	<i>"Other banks pull documents directly from government portals (ITR, GST, bank statements). ICICI requires only salary slip, PAN, and Aadhar; rest auto-fetched from FinFort and auto-filled."</i>
Simplified Consent and Authentication	Competitors simplify customer verification using single consent OTPs instead of multiple OTPs, reducing friction and delays.	HDFC, IDFC, Aditya Birla	<i>"Other banks required just single OTP to process their loan, in Axis DSA needs 4-6 OTPs from customer which is frustrating."</i>
Sanction-before-Verification Model	Competitors often issue conditional sanctions first before verification to speed up processing, unlike Axis where login precedes verification.	HDFC, ICICI	<i>"HDFC, ICICI keep sanction first (subject to condition) and then verification (it used to happen in Axis also but was changed)."</i>

About competitors 2/2

Advantage	Description	Competitor(s)	Quotes
Digital Disbursement and Online Agreements	Competitors enable digital disbursement and online signing, improving ease for customers and employees.	Credila, IDFC, ICICI	<i>"Credila, IDFC do online agreement too. ICICI's disbursement is also digital."</i>
Daily MIS and Tracking Features	Competitors have MIS tracking and status update notifications built into their systems, improving transparency for sales teams and DSAs.	ICICI	<i>"ICICI has daily MIS (Management Information System) which is missing in Axis. ICICI iLens sends automatic updates and query resolution on app itself."</i>
User-Centric Design & Notifications	Competitor systems offer status updates, query resolutions, and nudges within the app for better experience.	ICICI	<i>"currently Siddhi has no notifications when file status updates."</i>
Digitising Agent Empanelment Process	Competitors have simpler digital agent empanelment processes compared to Axis, which remains manual.	Yes Bank	<i>"The code needed to empanel agent is generated via a physical process. In other banks it is digital. Yes Bank does it in hardly 4-5 days."</i>
Refundable Login Fees	Some competitors take legal verification before login and avoid non-refundable fees, reducing drop-offs.	(unspecified)	<i>"Some take legal first and only do login if that is cleared. But we do login first with fees which is not refundable this cause customer drop offs."</i>

Thank You
